

veanavite®

The foundation for a lifetime of performance

Farmyard

STOCKFEED ONLY

Veanavite Farmyard is premium quality milk replacer scientifically formulated specifically for young farm animals. It is suitable for calves, foals, lambs, kid goats, alpaca cria and piglets, and as a supplement to the diet of puppies and adult dogs. A quality blend of spray dried milk powders provide a rich source of protein and energy in a blend fortified with vitamins and minerals and antioxidants. Veanavite Farmyard also has an added multi-strain Probiotic and Fibosel® to boost natural self defence.

CALVES Feed up to 4 litres of colostrum immediately after birth of the calf and continue over a minimum of two feeds per day for the first 2 days. After the colostrum phase commence feeding calves according to the table: **(All figures are per calf)**

Day	No. Days	Number of feeds per day	Milk Powder per feed (Grams)	Water per feed (Litres)	Total feed volume per feed (Litres)	Total milk powder /calf/day (Grams)
Day 1 (Colostrum)	1	2	NA	NA	NA	NA
Day 2-3	2	2	250	2.00	2.00	500
Day 4-7	4	2	300	2.00	2.30	600
Day 8-14	7	2	350	2.30	2.60	700
Day 15-21	7	2	400	2.70	3.10	800
Day 22-28	7	2	450	3.00	3.40	900
Day 29-49	21	2	500	3.00	3.50	1000
Day 50-55	5	2	300	2.00	2.70	700
Day 56-60	5	2	300	2.00	2.30	500
Day 61-63	4	1	300	2.00	2.30	300

Calves consuming 1.0kg – 1.5kg pellets per calf per day for 3 consecutive days can be safely weaned off milk

Feeding rates based on average 45kg birthweight calf. For small calves rates may be reduced by 10-20%

LAMB AND KID GOATS Provide the lamb or kid goat with at least one 50mL feed of colostrum within 12 hours of birth. Preferably, provide three feeds of 100mL each of colostrum over 18 hours. Cow colostrum is a suitable alternative if ewe or doe colostrum is not available. Add 200 grams of Veanavite Farmyard Milk Replacer to 850mL of fresh, warm water. This will make up approx 1 litre of Milk Replacer. (Multiply out for larger volumes.) Mix thoroughly with a whisk until dissolved.

Day of Feeding	Daily Intake (ml)	Number of feeds per day	Volume per feed (ml)
Day 2-7	750	5	150
Day 8-14	960	4	240
Day 15-21	1320	4	330
Day 22-28	1320	3	440
29 to weaning	950	2	475

PIGLETS Liquid feeding: Add 200gms of Veanavite Farmyard Milk Replacer per litre of warm water (35°C). Gruel feeding: Mix liquid Veanavite Farmyard Milk with solid feed to a porridge consistency. Supply piglets with sufficient dispensed milk or gruel that can be consumed in 4 hours. In the event of scouring remove Veanavite Farmyard Milk Replacer and provide Veanavite Veanalyte electrolyte. Ensure that all piglets receive colostrum. Feed as a supplement to sow's milk – feed unrestricted as liquid. Or as a substitute to sow's milk or in artificial rearing systems – feed unrestricted as a liquid or gruel (mixed with dry feed).

FOALS Provide the foal with 750-1000mls per 10kg of bodyweight of colostrum within 12 hours of birth. Divide the total volume of colostrum into equal quantities and feed every hour for the first 12 hours. Mix 100grams of Veanavite Farmyard per litre of fresh, warm water and mix thoroughly until dissolved. Begin feeding milk mixture at 10% of bodyweight from day 1 and gradually increase to 20% of body weight by day 10. Calculate the total volume of milk required daily and divide into equal amounts and feed four times per day for the first four weeks and then reduce to three feeds per day until the foal is weaned.

ALPACA CRIA Feed adequate colostrum. Mix Veanavite Farmyard at the rate of 200grams per litre of warm water and feed in accordance with the following table:

Day	Number of feeds per day	Milk Powder per feed (Grams)	Water per feed (Litres)	Total feed volume per feed (ml)
Day 1 (Colostrum)	6	NA	NA	NA
Day 2-7	6	20	100	110
Day 8-14	6	40	200	220
Day 15-21	4	60	300	330
Day 22-28	4	80	400	440
Day 29-84	3	100	500	550

PUPPIES As a supplement to the diet of puppies mix Veanavite Farmyard at the rate of 200grams per litre of warm water and mix the formula in with tinned feed or kibble at 20% of the total feed volume.

ADULT DOGS Veanavite Farmyard can be fed as a high quality supplement to the diet of nursing bitches, working dogs and racing greyhounds. Mix 50-100grams of dry Veanavite Farmyard milk powder in with feed.

TYPICAL ANALYSIS: Protein 26% Fat 22%

INGREDIENTS: Quality spray dried milk powders and dairy based products, Vitamins and minerals, Lecithin, Protexin® Probiotic, Fibosel® B-glucans.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

STORAGE INSTRUCTIONS: Store in a cool, dry, rodent free area. For maximum freshness we recommend that Veanavite Milk Replacers should be used within 12 months of the date of manufacture. Store any unused portions in a clean, rodent proof, airtight container.
